

FEATURES

- **IP66 Rated for Outdoor Use:** Ensures complete protection against dust, strong jets of water, and other harsh outdoor elements.
- **Ideal for Outdoor Installation:** Rugged design with rust-proof, moisture-proof, and UV-resistant coating makes it perfect for long-term outdoor deployment.
- **Convenient Internal Mounting Board:** Includes a galvanized multifunctional mounting plate with multiple pre-drilled holes, making it easy to install various equipment and manage complex wiring.
- **Easy Wall or Pole Mounting:** The back of the enclosure features built-in mounting holes and hoop grooves, allowing for secure wall or pole installation.
- **Durable Construction:** Made from high-quality cold-rolled steel plate with matte white-gray powder-coated finish.
- **Advanced Sealing System:** EVA sealing strip enhances waterproof, fire-resistant, and high-temperature-resistant performance.
- **Enhanced Door Design:** Stainless steel 308 outdoor rainproof lock and upgraded hinge system ensure security and ease of access without compromising aesthetics.
- **Optional DIY Add-Ons:** Left side panel supports separate guide rail installation for custom setups.

**Product Description:**

This IP66-rated waterproof iron box is engineered for demanding outdoor and industrial environments. Built with precision and durability in mind, it offers superior protection for electrical and communication equipment.

Application:

Perfect for outdoor electrical, surveillance, communication, and industrial control installations requiring a secure and weatherproof solution.

GENERAL

Dimensions	400mm (L) x 400mm (W) x 250mm (H)
Color	Matte white gray
Material	High-quality cold-rolled steel
Lock	Stainless steel rainproof door lock
Sealing Strip	EVA high-performance strip
Finish	Galvanized + electrostatic powder coating

Included Accessories:

- 1 x Waterproof Box
- 1 x Stainless Steel Key
- 1 x Galvanized Internal Mounting Plate
