

Flex Gen4 Long Range Bullet Camera

Deep learning AI

Flex Gen4 bullet camera supports edge intelligence with an expansive list of object classifications for accurate object detection in all lighting conditions.

High-end image stabilization

Image stabilization using a gyro sensor provides quality, stable images in challenging outdoor conditions, thus providing huge cost benefits vis-à-vis reduced bit-rates and storage.

Onvif conformant

Open standard (Onvif Profile S, G, T, M) interface provides investment protection by integrating into the existing VMS platform.

Advanced system-on-chip

Supports low-power design and high-performance application. Thus providing outstanding low-light images, HDR, and advanced security features for next-gen intelligent Flex Gen4 IP cameras.

Dual Full HD video streaming

Mission-critical applications with the requirement of multiple full high-definition video streams are supported by Flex Gen4 bullet cameras.

Cyber Secure

Flex Gen4 series cameras support secure boot, signed firmware, and encrypted streaming & storage. It complies with stringent JCI cyber norms, which are comprehensive and cover the product's entire life cycle.
