## GV-FR Panel V2 Version History

### Firmware V1.20 2026-01-07

#### New

- Support for two operation modes: Standalone and GV-ASManager
- Tailgating detection supported through integration with the GV-GEBF4911 camera (firmware V1.03) for both Standalone and GV-ASManager modes

#### Fixed

- Chances of losing the device's established IP address after disconnecting and reconnecting power

#### Modified

- Downgrade to firmware V1.10 not supported due to incompatibility with V1.20 database

### Firmware V1.10 2025-07-17

#### New:

- Support for the confidence parameter to refine search results for similarity
- Support for card swiping for access, without facial enrollment, when integration with GV-ASManager in Card or Face Mode

### Firmware V1.02 2025-03-21

#### New:

- Addition of the Reboot option to the local settings (Config) and web settings (System Settings)

#### Fixed:

- Chances of a black screen displaying when enrolling faces on the GV-FR Panel V2 using the Local Enroll Mode

## Firmware V1.01 2024-12-20

### Fixed:

- Issue with an unnecessary toolbar appearing on the screen upon launching the panel
- Issue with the Device Setting Only option on GV-Face Manager not functioning when exporting or importing backup data from the panel
- Issue with panel restart when recognizing specific faces
- Chances of restoring factory default failed on some panels
- Chances of panel restart occurred over an extended period of operation
- Issue with panel restart when disconnected from the controller but still recognizing faces
