

Summary

DW Spectrum Enterprise is a Video Surveillance as a Service (VSaaS) Management Solution for the Managed Service Provider (MSP). The platform is designed for intelligent video and data management and visualization. DW Spectrum Enterprise enables system administrators to manage users, workstations, servers, and network devices from anywhere through a unified, cloud-optimized dashboard that is easy to use and scales to your needs.

DW Spectrum Enterprise Features

Enjoy all the features and benefits of DW Spectrum Professional, plus:

- Seamless scalability and centralized management.
- A cloud-centric approach to surveillance systems management.
- Unified site organization with across-the board system visualization.
- Unified notifications across all sites for immediate and actionable alerts.
- Unified user management across multiple sites and servers keep systems safe with updates to user permissions pushed instantly to the field.
- DW Maps mapping tool with advanced geolocation data visualization (early adopters get lifetime access for free).
- DW Connect Managed Service Provider (MSP) tool for DW partners helps sell and manage subscription services in a secure, unified system.
- DW Cumulus cloud storage lets users go from terabytes to petabytes in minutes (add-on, sold separately).

DWS-ENT36M24C	24 Devices, 36 Months Subscriptions
DWS-ENT36M48C	48 Devices, 36 Months Subscriptions

Getting Started

1. Update your DW Spectrum.

Ensure your systems are running the latest DW Spectrum and all servers are up to date.

2. Get your organization set up.

Once you convert your licenses for a subscription key, your MRP will create an organization for your company in DW Connect and send you an invite. Activate your subscription key, and you're good to go!

3. Convert your licenses for subscriptions.

DW Spectrum Professional users can convert their recording licenses for 24-month Enterprise subscriptions. Contact your service provider.
