

Data Sheet

# exacqVision Professional VMS Software for Medium to Multi-Site Installations

#### Key Features

- High video throughput with minimal CPU and RAM requirements
- Powerful search capabilities in an intuitive interface
- exacqReplay provides instant replay of events
- Step-by-step online system configurator calculates storage and bandwidth requirements
- Client-side fisheye camera dewarping provides distortion-free images
- Cybersecurity features include HTTPS encryption, complex passwords, and user lockout
- Compatible with over 3,300 models of IP cameras and encoders, including the H.265 codec
- Constantly expanding functionality with included software updates

### Powerful Video Management System (VMS)

exacqVision Professional VMS software records surveillance video from thousands of IP camera models and freely displays video on Windows, Linux or OSX client software.

exacqVision Professional can be licensed for up to 128 IP cameras per server and provides a robust feature set to organizations that require an easy-to-use VMS with integrations, mapping, and enhanced searches.

#### Monitor Video, Audio and Data in Real Time

Users can monitor both video and audio (including two-way) in real time utilizing a customizable full-screen video wall with notification overlays.

Advanced functionality such as interactive mapping, suspect tracking, and data integration from retail point-of-sale and access control systems provide superior visibility of all events.

#### Conduct Investigations on Recorded Video and Audio

exacqVision's searching capabilities are extensive, including powerful timeline, list view, and thumbnail search tools. Users can easily conduct investigations on recorded video and audio across multiple cameras and even leverage event data from intrusion and access control systems to improve search results.

Bookmark important video to easily view later and export clips in open-standard video formats or as a self-contained player with tamper protection.

#### Easy to Install and Use

exacqVision is fast and easy to install with little to no training. The innovative EasyConnect feature automatically finds, assigns and addresses supported IP cameras to your network, saving time and reducing data entry errors.

The freely distributed client, browser and mobile apps all feature the same intuitive interface that makes day-to-day use of the system instinctive.

#### Flexible and Scalable Deployment

exacqVision Professional VMS software comes pre-configured and pre-installed on exacqVision NVRs and installs easily on third-party servers.

exacqVision supports thousands of IP camera models, and you can add IP cameras as needed with our simple, percamera license model with no base server fee.

#### **Expandable Functionality**

exacqVision Professional offers integrations with 3rd party solutions including intrusion detection and video analytics such as license plate recognition, heat mapping, and behavior analysis.

Easily expand functionality by upgrading to exacqVision Enterprise Edition at any time, and leverage your valid SSA to benefit from the latest software and cybersecurity features released each quarter.

# exacqVision VMS Software Overview

Software specifications are subject to change without notice.	Start	Professional	Enterprise
System			
Max Cameras Per Server	16 analog / 16 IP	64 analog / 128 IP	64 analog / 128 IP
Max Server Connections Per Client	1	1000 (client) / 16 (web browser client	512 (client) / 16 (web browser client)
